

Revised New Jersey Requirements for 2011 MRSA Reporting Using the NHSN MDRO/CDI Module

Dawn M. Sievert, PhD, MS
Epidemiologist, Surveillance Branch
Division of Healthcare Quality Promotion
NCEZID, CDC

SAFER • HEALTHIER • PEOPLE™

Outline

- 1) New 2011 MRSA reporting requirements**
- 2) Adding locations in NHSN**
- 3) New method for Conferring Rights**
- 4) Completion of a Monthly Reporting Plan**
- 5) Entry of blood specimen LabID Events**
- 6) Entry of monthly denominator data for LabID reporting**
- 7) Entry of monthly Admission AST Adherence data**

New 2011 MRSA Reporting Requirements for New Jersey

Important Information

- 1) The New Jersey MRSA legislation (*N.J.S.A. 26:2H-12.35 et seq.*) has not been changed**
- 2) The reporting elements required to meet this legislative mandate have been updated by the NJ DHSS**
- 3) The new requirements will begin January 2011**
- 4) The reasons for these updated reporting requirements include: better standardization of reporting definitions and methods and NHSN system guidance and evaluation of data entry**

2011 MRSA Reporting

- Organism = MRSA
- Data Collection:
 - CDC NHSN - MDRO/CDI Module
- Required Facilities and Locations:
 - All acute care hospitals
 - All inpatient locations facility-wide for LabID Events
 - Locations specified by the facility for AST
- Required Data:
 - CO and HO LabID Event blood specimens at the facility-wide level
 - Adherence to AST in chosen locations

What Will be Different?

- Specific Reporting for **LabID Events**:
 - Must monitor blood specimen LabID Events at the **facility-wide** inpatient level
 - Must report **all CO and HO** blood specimen LabID Events
- Overall **MRSA Reporting**:
 - Must add this reporting info to the **Monthly Reporting Plan**
 - Data entry for LabID Event and AST Adherence reporting will be **“in-plan”** according to the module protocol
 - Business rules and edit checks will help guide appropriate and accurate reporting

How Will this Help?

- Standardized definitions for what is reported as HO and CO
- No required calculating of days between admission and specimen collection
- Only one facility-wide Total Patient Days and Total Admissions count per month for required LabID Events
- Efficient and effective transmission prevention efforts are dependent on knowing:
 - CO-Prevalence information (exposure pressure/burden)
 - MRSA exposure and infection burden throughout a facility (not only in ICUs)
- Reporting “in-plan” allows for faster and more accurate data entry:
 - System will guide a user to required fields
 - System will release alerts and reminders when data are missing

Adding Locations into NHSN

Why do I Need to Add Locations?

- LabID Event reporting of MRSA-positive blood specimens is now required at the facility-wide inpatient level (FacWideIN)
- Each LabID Event (numerator) is reported according to the patient's location when the specimen is collected
- This means that any inpatient unit could potentially house a patient who has an MRSA blood specimen LabID Event
- Two choices available to ensure that a location is available for reporting when a LabID Event is identified:
 - Add all inpatient locations before reporting begins in 2011
 - Add each inpatient location as it is identified as a location where a qualifying LabID Event was collected from a patient

Conferring Rights (new method in 2011)

How will Confer Rights be Different?

- Confer Rights will be different for NJ facilities in two ways:
 - The updated NJ reporting requirements include different data to be shared
 - Facilities will be reporting all CO and HO MRSA blood specimen LabID Events
 - Facilities will be reporting at the facility-wide inpatient level (FacWideIN)
 - Responsibility for template set-up is transitioning to the Group
 - The NJ State HAI Group will set up the template with all details of the specific data that need to be shared
 - For some sharing, facilities may need to specify their locations (these choices will be highlighted clearly)
 - Facilities will “Accept” the template specified by the Group

Confer Rights

Step #2

[?HELP](#)

Leave Group(s)

[?HELP](#)

Step #1

Message from webpage

The decision to confer rights to a group is a decision made by a facility administrator. Existence of a group organization in NHSN should not be construed as a recommendation from CDC to join the group. CDC cannot be held accountable for how group users use data access granted to the group by a facility.

The screenshot shows the NHSN reporting interface. At the top left is the CDC logo. The header text reads "Department of Health and Human Services" and "Centers for Disease Control and Prevention". Below this is the "NHSN - National Healthcare Safety Network (ISD-CLFT-NHSN1)" banner with a "NHSN Home" link on the right. A left-hand navigation menu includes "NHSN Home", "Reporting Plan", "Patient", "Event", "Procedure", "Summary Data", "Import/Export", "Analysis", "Surveys", "Users", and "Facility". The main content area shows the user is logged into Pleasant Valley Hospital (ID 10312) as DSIEVERT. A red oval highlights the "Add Monthly Reporting Plan" button. Below it, a message states "No data found for February, 2011". A section for "Mandatory fields marked with *" includes dropdown menus for "Facility ID*" (Pleasant Valley Hospital (ID 10312)), "Month*" (February), and "Year*" (2011). A checkbox "No NHSN Patient Safety Modules Followed this Month" is also present.

Copy from Previous Month

Entry of Blood Specimen LabID Events

What are the Rules for Entering MRSA Blood Specimen LabID Events FacWideIN?

- MRSA-positive blood specimens MUST be monitored throughout all inpatient locations within a facility for FacWideIN reporting
- An MRSA blood specimen LabID Event MUST be entered whether it is community-onset (CO) or healthcare facility-onset (HO)
- For a patient in a specific location, a new MRSA blood specimen qualifies as a LabID Event after 14 days or greater from a prior one
 - The 14-day rule not only includes the 14-days after a previously reported blood LabID Event, but there must also be 14-days since the last MRSA-positive result reported from the lab for the patient in the specific location
- LabID Events never include results from Active Surveillance Testing

NHSN will Categorize your MRSA Blood Specimen LabID Events as CO or HO

Community-Onset (CO): LabID Event specimen collected as an inpatient ≤ 3 days after admission to the facility (i.e., days 1, 2, or 3 of admission to the facility).

- Prevalence metrics will include the CO blood LabID Events

Healthcare Facility-Onset (HO): LabID Event specimen collected > 3 days after admission to the facility (i.e., on or after day 4 of admission to the facility).

- Incidence metrics will include the HO blood LabID Events

Entry of Monthly Admission AST Adherence Data by Specified Locations

What are the Rules for Entering MRSA Admission AST Adherence Data?

- These are aggregate counts of location specific MRSA Admission AST and are entered at the end of each month
- Admission AST must be performed within the first three days upon patient admission to a specific unit (Admit=Day 1, 2, 3)
- The facility must conduct MRSA Admission AST in at least one specific high-risk location, and up to as many as the facility chooses
- The facility should share data from all MRSA Admission AST locations with the NJ State HAI Group
- The facility must decide for each specific location whether to conduct Admission AST on ALL patients admitted to the unit, or only on NHx patients admitted to the unit

Definitions for Monitoring Adherence to MRSA Admission AST

- AST Eligible Patients: (facility chooses one of the following)
 - All : All patients admitted to the selected location regardless of history of MRSA infection or colonization
 - NHx : Only patients admitted to the selected location with NO documented positive MRSA infection or colonization during the previous 12 months
- Counts for Admission AST Eligible:
 - For All - total # of patients admitted to the unit in the month
 - For NHx – # of patients admitted to the unit in the month with no history of MRSA in previous 12 months
- Counts for Admission AST Performed: # of patients who received MRSA AST in the first three days of admission to the unit in the month
