Source: 2002-2005 Birth Certificate files for NJ resident mothers from Center for Health Statistics.

Infant Mortality Rates in this table are calculated using infant deaths occurring to resident births (<365 days old) from Death Certificate files (numerator) per 1,000 live births between 2002-2005 and based on the Birth Certificate files (denominator). \*All\* includes others and unknowns.

\* Indicates the calculated rate does not meet standard of reliability or precision; based on a numerator of <20.
